Program Target

Recommended Corporations

Our Services Framework

We follow a systematic process to create an initiatives that suitable and sustainable based on the needs and problem

Leveraging in-depth social mapping, we've meticulously analyzed potential fields for impactful CSR initiatives. Our data-driven approach enables us to recommend ideal corporate partners aligned with your sustainability goals. Through a comprehensive understanding of community needs and corporate objectives, we develop tailored CSR programs that create measurable social and environmental value.

Our CSR Portfolio

River Cleanup and Audit

CSWM UI ; Net Zero Waste Management Consortium

CSWM UI's Youth for Ciliwung River Cleanup is a leading CSR initiative that engages over 150 young volunteers in cleaning up the Ciliwung River, conducting scientific research on plastic pollution, and developing data-driven solutions to promote sustainable waste management.

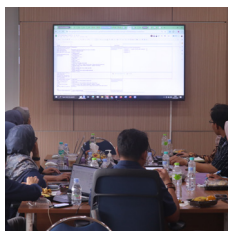

Education for Junior High Schoolers

CSWM UI's CSR program pioneers a curriculum-integrated approach to waste management education, empowering junior high students to become environmentally conscious leaders through practical learning and fostering a long-term commitment to sustainability.

PAMTASA Educotourism Site

As part of our social and environment stewardship, we collaborate with Panti Asuhan Muhammadiyah Tanah Abang Sawangan in developing an ecotourism site as an educational and productivity centre through a proper waste management system and urban farming pilot project.

Expert Forum

CSWM UI

The CSWM UI Expert Forum is a bimonthly platform fostering collaborative dialogue among industry leaders, policymakers, and academics to address critical waste management challenges and drive innovative solutions.

Water Restoration

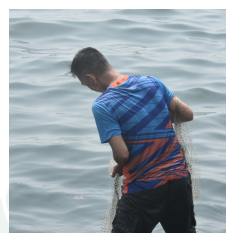

CSWM UI ; KOMIB

CSWM UI's collaboration with KOMIB, Pocari Sweat, and Ancol utilized green mussel filtration to restore water quality, showcasing a science-based, community-driven approach to environmental stewardship.

Education for Recycling Technology

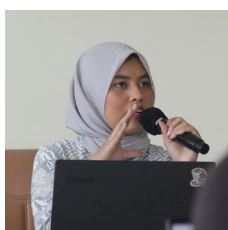

CSWM UI and GPTECH SCUI are empowering high school students with knowledge of plastic recycling technologies through interactive workshops. By promoting the circular economy, the program aims to cultivate a new generation of environmentally conscious leaders.

Beach Cleanup

CSWM UI ; GPTECH ; IMMT

CSWM UI's Beach Cleanup in collaboration with GPTECH and Material and Metallurgy Student combined hands-on litter removal with data collection and analysis. Volunteers were trained in waste handling and the collected data was used to inform future conservation efforts.

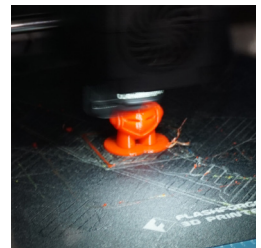

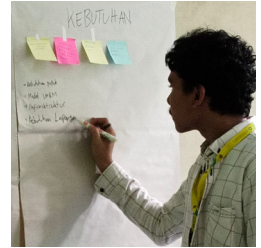

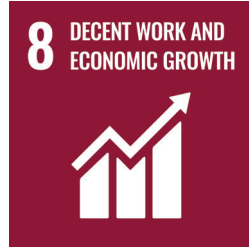

Capacity Building for Industry

CSWM UI offers comprehensive training programs to equip individuals and organizations with the knowledge and skills needed to tackle waste management challenges. We provide tailored capacity building solutions that drive a circular economy and a sustainable future.

We craft **transformative CSR strategies** aligned with the SDGs, delivering measurable impact and sustainable value for your business.
